

AutoTrack now available on AutoCAD 2010 and all verticals

*AutoTrack, the world's most advanced vehicle swept path analysis program,
becomes the first such system to be natively compatible with AutoCAD 2010*

FOR IMMEDIATE RELEASE
2 April 2009

Savoy Computing Services Ltd, authors of AutoTrack, the world's most advanced vehicle swept path analysis suite, are delighted to announce that AutoTrack v8.51, released on 30 March 2009, runs natively within AutoCAD 2010 and all associated verticals.

Over recent years Savoy have developed a reputation for providing customers with fast support for new versions of AutoCAD; this time is no different. According to Director, Simon Ayers, "Our Authorized Developer status allows us early access to new versions of AutoCAD and we take full advantage of this facility to ensure that AutoTrack builds and runs as early as possible. We know that if we don't provide support for new CAD versions quickly our customers will want to know the reason why".

About Savoy Computing Services

Savoy Computing Services Ltd have led the development of innovative vehicle swept path solutions since the early 1990's. Their products, which are regarded as standard design tools by many companies, provide architects, designers and engineers with the most advanced and comprehensive set of vehicle access planning tools available today. Savoy are Autodesk Authorized Developers and Bentley Enterprise Developers and their products run seamlessly on over 70 CAD variants, as well as stand-alone in Microsoft Windows. For more information on our products please visit www.savoy.co.uk.
