

AutoTrack *EXPRESS* rental store opens for business

*AutoTrack rental option lets users get essential work done
even if the CAPEX budget is frozen*

FOR IMMEDIATE RELEASE
21st September 2009

Savoy Computing Services Ltd have launched a scheme to make their flagship swept path analysis product, AutoTrack for Highway Design, available to infrequent users by allowing the product to be rented in one week periods. The new AutoTrack *EXPRESS* store allows small developers or individuals to use the latest version of the renowned and respected AutoTrack product on an as needed basis. Even those who would normally purchase the program may be subject to severe financial constraints... this scheme allows engineers to use AutoTrack for required fee earning work even when capital expenditure budgets are frozen.

The rental licence can be purchased securely from within the demo or full versions and is available for use immediately. If you opt to upgrade to a full licence before the expiry of the rental period Savoy will credit the cost of the entire rental period against the cost of the new licence. Once purchased, the rental licence can be transferred easily between computers and the rental period can be extended if required.

Director, Simon Ayers commented "We are going through difficult economic times when it's more important than ever to justify expenditure, manage cash flow and get value for money. This new scheme allows users to do just that. Now those who are unable to justify the purchase of a full copy are still able to use the software on a pay as you go basis."

Currently the scheme is only available in the UK but may be extended to other parts of the world.

Compatibility

AutoTrack v8.75 is available as a standalone application and natively compatible with the following:-

AutoCAD Civil 3D 2004 to 2010

AutoCAD 14 to 2010 (32 & 64-bit versions) and all other derivative products

Microstation 95 to V8i

PowerDraft 7.0 to V8i

PowerCivil XM to V8i

Bentley MX XM to V8i

Available in English, US English, French, German, Spanish, Italian & Portuguese.

About Savoy Computing Services

Savoy Computing Services Ltd have led the development of innovative vehicle swept path solutions since the late 1980s. Their products, which are regarded as standard design tools by many companies, provide architects, designers and engineers with the most advanced and comprehensive set of vehicle access planning tools available today. Savoy are Autodesk Preferred Industry Partners in Europe, Autodesk Authorized Developers and Bentley Enterprise Developers and their products run seamlessly on over 70 CAD variants, as well as stand-alone in Microsoft Windows.
